

ORDER NO.DSD0603003CE

# Service Manual

DVD Recorder

DMR-EH55EC / DMR-EH55EP / DMR-EH56EG

Vol. 1

Colour

(S).....Silver Type

(K).....Black Type

**Notes: This model's RAM/Digital P.C.B. Module are - RFKNEH55EC(EC)  
- RFKNEH55EP(EP)  
- RFKNEH56EG(EG).**

When replacing with Main P.C.B. or EEPROM, "UNFORMAT" indication is displayed and HDD must be formatted.

When replacing with HDD, it is necessary to update the firmware.

Please prepare the update disc.  
(After that, FORMAT is necessary)

After that, programme in the HDD will be lost.  
In detail, please refer to each content in this service manual.

**Caution:**

Pairing of RAM Drive and Digital P.C.B. as "RAM/Digital P.C.B. Module" have to be replaced together. If the pairing is changed, RAM Drive unit has to be re-aligned. Because the alignment data for RAM Drive Unit is stored in Digital P.C.B..

## SPECIFICATIONS

Manufactured under license from Dolby Laboratories. "Dolby" and the double-D symbol are trademarks of Dolby Laboratories.

"DTS" and "DTS 2.0 + Digital Out" are trademarks of Digital Theater Systems, Inc.

Apparatus Claims of U.S. Patent Nos. 4,631,603, 4,577,216, and 4,819,098, licensed for limited viewing uses only.

This product incorporates copyright protection technology that is protected by method claims of certain U.S. patents and other intellectual property rights owned by Macrovision Corporation and other rights owners. Use of this copyright protection technology must be authorized by Macrovision Corporation, and is intended for home and other limited viewing uses only unless otherwise authorized by Macrovision Corporation. Reverse engineering or disassembly is prohibited.

MPEG Layer-3 audio decoding technology licensed from Fraunhofer IIS and Thomson multimedia.

Unauthorized copying and distribution is a violation of law.**

### **WARNING**

This service information is designed for experienced repair technicians only and is not designed for use by the general public. It does not contain warnings or cautions to advise non-technical individuals of potential dangers in attempting to service a product. Products powered by electricity should be serviced or repaired only by experienced professional technicians. Any attempt to service or repair the product or products dealt with in this service information by anyone else could result in serious injury or death.

# **Panasonic®**

## **1. Safety Precaution**

### **1.1. General guidelines**

- 1. When servicing, observe the original lead dress. If a short circuit is found, replace all parts which have been overheated or damaged by the short circuit.**
- 2. After servicing, see to it that all the protective devices such as insulation barriers, insulation papers shields are properly installed.**
- 3. After servicing, make the following leakage current checks to prevent the customer from being exposed to shock hazards.**

#### **1.1.1. Leakage current cold check**

- 1. Unplug the AC cord and connect a jumper between the two prongs on the plug.**
- 2. Measure the resistance value, with an ohmmeter, between the jumpered AC plug and each exposed metallic cabinet part on the equipment such as screwheads, connectors, control shafts, etc. When the exposed metallic part has a return path to the chassis, the reading should be between 1M  $\Omega$  and 5.2M  $\Omega$  .  
When the exposed metal does not have a return path to the**

chassis, the reading must be  $\infty$ .

Figure 1

### 1.1.2. Leakage current hot check / (See [Figure 1](#) .)

1. Plug the AC cord directly into the AC outlet. Do not use an isolation transformer for this check.
2. Connect a 1.5k  $\Omega$  , 10 watts resistor, in parallel with a 0.15  $\mu$  F capacitors, between each exposed metallic part on the set and a good earth ground such as a water pipe, as shown in [Figure 1](#).
3. Use an AC voltmeter, with 1000 ohms/volt or more sensitivity, to measure the potential across the resistor.
4. Check each exposed metallic part, and measure the voltage at each point.
5. Reverse the AC plug in the AC outlet and repeat each of the above measurements.
6. The potential at any point should not exceed 0.75 volts RMS. A leakage current tester (Simpson Model 229 or equivalent) may be used to make the hot checks, leakage current must not exceed 1/2 milliampere. In case a measurement is outside of the limits specified, there is a possibility of a shock hazard, and the equipment should be repaired and rechecked before it is returned to the customer.

## 2. Warning

### 2.1. Prevention of Electrostatic Discharge (ESD) to Electrostatic Sensitive (ES) Devices

Some semiconductor (solid state) devices can be damaged easily by static electricity. Such components commonly are called Electrostatic Sensitive (ES) Devices. Examples of typical ES devices are integrated circuits and some field-effect transistor-sand semiconductor "chip" components. The following techniques should be used to help reduce the incidence of component damage caused by electrostatic discharge (ESD).

- 1. Immediately before handling any semiconductor component or semiconductor-equipped assembly, drain off any ESD on your body by touching a known earth ground. Alternatively, obtain and wear a commercially available discharging ESD wrist strap, which should be removed for potential shock reasons prior to applying power to the unit under test.**
- 2. After removing an electrical assembly equipped with ES devices, place the assembly on a conductive surface such as aluminum foil, to prevent electrostatic charge buildup or exposure of the assembly.**
- 3. Use only a grounded-tip soldering iron to solder or unsolder ES devices.**
- 4. Use only an anti-static solder removal device. Some solder removal devices not classified as "anti-static (ESD protected)" can generate electrical charge sufficient to damage ES devices.**
- 5. Do not use freon-propelled chemicals. These can generate electrical charges sufficient to damage ES devices.**
- 6. Do not remove a replacement ES device from its protective package until immediately before you are ready to install it. (Most replacement ES devices are packaged with leads electrically shorted together by conductive foam, aluminum foil or comparable conductive material).**
- 7. Immediately before removing the protective material from the leads of a replacement ES device, touch the protective material to the chassis or circuit assembly into which the device will be installed.**  
**Caution**  
**Be sure no power is applied to the chassis or circuit, and observe all other safety precautions.**
- 8. Minimize bodily motions when handling unpackaged replacement ES devices. (Otherwise harmless motion such as the brushing together of your clothes fabric or the lifting of your foot from a carpeted floor can generate static electricity sufficient to damage an ES device).**

## IMPORTANT SAFETY NOTICE

There are special components used in this equipment which are important for safety. These parts are marked by  $\Delta$  in the schematic diagrams, Exploded Views and replacement parts list. It is essential that these critical parts should be replaced with manufacturer's specified parts to prevent shock, fire, or other hazards. Do not modify the original design without permission of manufacturer.

## 2.2. Precaution of Laser Diode

### CAUTION:

This product utilizes a laser diode with the unit turned "on", invisible laser radiation is emitted from the pickup lens. Wave length: 662 nm (DVDs)/780 nm (CDs) Maximum output radiation power from pickup: 100  $\mu$  W/VDE

Laser radiation from the pickup lens is safety level, but be sure the followings:

1. Do not disassemble the optical pickup unit, since radiation from exposed laser diode is dangerous.
2. Do not adjust the variable resistor on the pickup unit. It was already adjusted.
3. Do not look at the focus lens using optical instruments.
4. Recommend not to look at pickup lens for a long time.

KLASS 1 LASER APPARAT

CLASS 1  
LASER PRODUCT

### ACHTUNG:

Dieses Produkt enthält eine Lasereinheit.

Im eingeschalteten Zustand wird unsichtbare Laserstrahlung von der Lasereinheit abgestrahlt.

Wellenlänge: 662 nm (DVDs)/780 nm (CDs)

Maximale Strahlungsleistung der Lasereinheit: 100  $\mu$  W/VDE

Die Strahlung der Lasereinheit ist ungefährlich, wenn folgende Punkte beachtet werden:

1. Die Lasereinheit nicht zerlegen, da die Strahlung an der freigelegten Lasereinheit gefährlich ist.
2. Den werkseitig justierten Einstellregler der Lasereinheit nicht verstellen.
3. Nicht mit optischen Instrumenten in die Fokussierlinse blicken.
4. Nicht über längere Zeit in die Fokussierlinse blicken.

<b>DANGER</b> - VISIBLE AND INVISIBLE LASER RADIATION WHEN OPEN. AVOID DIRECT EXPOSURE TO BEAM.	
<b>注意</b> - 打开时可见及不可见激光辐射。避免激光辐射。

### CAUTION!

THIS PRODUCT UTILIZES A LASER.

USE OF CONTROLS OR ADJUSTMENTS OR PERFORMANCE OF PROCEDURES OTHER THAN THOSE SPECIFIED HEREIN MAY RESULT IN HAZARDOUS RADIATION EXPOSURE.

## 2.3. Service caution based on legal restrictions

### 2.3.1. General description about Lead Free Solder (PbF)

The lead free solder has been used in the mounting process of all electrical components on the printed circuit boards used for this equipment in considering the globally environmental conservation.

The normal solder is the alloy of tin (Sn) and lead (Pb). On the other hand, the lead free solder is the alloy mainly consists of tin (Sn), silver (Ag) and Copper (Cu), and the melting point of the lead free solder is higher approx.30 degrees C (86°F) more than that of the normal solder.

Definition of PCB Lead Free Solder being used

The letter of "PbF" is printed either foil side or components side on the PCB using the lead free solder.  
(See right figure)

PbF

Service caution for repair work using Lead Free Solder (PbF)

- The lead free solder has to be used when repairing the equipment for which the lead free solder is used.  
(Definition: The letter of “PbF” is printed on the PCB using the lead free solder.)
- To put lead free solder, it should be well molten and mixed with the original lead free solder.
- Remove the remaining lead free solder on the PCB cleanly for soldering of the new IC.
- Since the melting point of the lead free solder is higher than that of the normal lead solder, it takes the longer time to melt the lead free solder.
- Use the soldering iron (more than 70W) equipped with the temperature control after setting the temperature at  $350\pm30$  degrees C ( $662\pm86^{\circ}\text{F}$ ).

Recommended Lead Free Solder (Service Parts Route.)

- The following 3 types of lead free solder are available through the service parts route.  
 RFKZ03D01K----- (0.3mm 100g Reel)  
 RFKZ06D01K----- (0.6mm 100g Reel)  
 RFKZ10D01K----- (1.0mm 100g Reel)

**Note**

\* Ingredient: tin (Sn), 96.5%, silver (Ag) 3.0%, Copper (Cu) 0.5%, Cobalt (Co) / Germanium (Ge) 0.1 to 0.3%

## 3. Service Navigation

### 3.1. Service Information

This service manual contains technical information which will allow service personnel's to understand and service this model.

Please place orders using the parts list and not the drawing reference numbers.

If the circuit is changed or modified, this information will be followed by supplement service manual to be filed with original service manual.

1) This service manual does not contain the following information, because of the impossibility of servicing at component level.

- \* Schematic Diagram, Block Diagram and P.C.B. layout of RAM/Digital P.C.B. Module.
- \* Parts List for individual parts of RAM/Digital P.C.B. Module.
- \* Exploded View and Parts List for individual parts of RAM/Digital P.C.B. Module.

2) The following category are recycle module part. Please send them to Central Repair Center.

- \* RAM/Digital P.C.B. Module  
(EH55EC: RFKNEH55EC, EH55EP: RFKNEH55EP, EH56EG: RFKNEH56EG)

## 3.2. Caution for DivX

Please will always pass the customer "Warning for Customers Who Use the DivX Video-on-Demand content." with the product and get it when you unavoidably exchange EEPROM or P.C.B. including EEPROM (When the product is exchanged, it is the same.).

You must use print attached to service part (EEPROM or P.C.B. including EEPROM) or must use copy of print below as "Warning for Customers who use the DivX Video-on-Demand content."

Information needed without fail for the customer for whom it is used continuing DivX Video-on-Demand Service to "Manual for the customer" is recorded.

Appendix:

- \* Parts that memorize user's information are only EEPROM.
- \* The registration of Registration Code is possible for half a year up to 6 recorders up to 10 recorders a year.  
Replacement of EEPROM or P.C.B. including EEPROM spends one of this.

Registration Code is memorized in EEPROM (RFKFxxxxxx).

Model without VHS: Main P.C.B.

Model with VHS: Digital I/F P.C.B. (Power & DVD I/F/P.C.B.)

If exchange above P.C.B. or EEPROM, new registration Code differ from previous Registration Code will be generated.

In this case if your customer uses DivX Video-on-Demand service, he/she will no longer be able to play any content that he/she purchased under that same registration code.

Therefore your customer will need to obtain and register the new registration code.

\*Copy this page and cut on the dotted line and give the lower half to your customer.

---

### Warning for Customers who use the DivX Video-on-Demand content.

1. The registration code has been changed for the repair of the product or the product exchange.
2. Obtain and register a new registration code, otherwise you will no longer be able to play DivX Video-on-Demand content.
3. Follow the procedure on the DivX Video-on-Demand web site to register at  
<http://vod.divx.com/>

\* If you do not use the DivX Video-on-Demand content, please ignore this warning.

## 4. Specifications

Power supply	AC220-240 V, 50 Hz	Compression Method	DVD (DivX), CD (DivX)
Power consumption	Approx. 31 W	*1 Total number of recognizable file including MP3, JPEG, DivX and other type of files is 4000.	DivX 3.11, 4.x, 5.x
Power consumption in standby mode	Approx. 2 W (Power Save mode)		GMC (Global Motion Compensation) is not supported.
Recording system	DVD-RAM: DVD Video Recording format DVD-R: DVD-Video format DVD-R DL (Dual Layer): DVD-Video format DVD-RW: DVD-Video format +R +R DL (Double Layer) +RW		DVD (DivX), CD (DivX) Common Items
Optical pick-up	System with 1 lens, 2 integration units (662 nm wavelength for DVDs, 780 nm wavelength for CDs)		Maximum number of folders: 300 Recognizable folders per disc on this unit (including the root folder) Maximum number of DivX files: 200 Recognizable DivX files per disc on this unit *1

	South Africa(PAL-I)	VHF: CH 4 - CH 13 UHF: CH 21 - CH 68
RF Converter Output	Not provided	
DV Input	IEEE 1394 Standard, 4pin	
SD System		
SD Card Slot	SD memory card slot: 1pc	
Still Picture (JPEG, TIFF)		
Compatible Media	SD memory card */Multi Media Card *Includes miniSD™ cards. (A miniSD™ card adapter needs to be inserted.)	
Format	FAT12, FAT16	
Image file format	JPEG conforming to DCF (Design rule for Camera File system) (sub sampling: 4:2:2 or 4:2:0) TIFF (Uncompressed RGB chunky) DPOF Compatible	
Number of pixels	34 x 34 to 6144 x 4096	
Shooting time	Approx. 3sec (6M pixels, JPEG)	
SD Video (MPEG2)		
Compatible Media	SD memory card */Multi Media Card *Includes miniSD™ cards. (A miniSD™ card adapter needs to be inserted.)	
Codec	MPEG2 (SD Video Entertainment Video Profile)	
File format	SD-Video format conforming	
Video Recording conversion and transfer is possible from card to HDD or DVD-RAM disc. After Video Recording conversion and transfer to HDD or DVD-RAM disc, the playback is possible.		
Audio system		
Recording system	Dolby Digital 2ch, Linear PCM (XP mode)	
Audio Input	AV1/AV2 (21pin) x 2, AV3/AV4 (pin jack) x 2 Standard input: 0.5 Vrms Full scale: 2.0 Vrms at 1KHz Input impedance: More than 10KΩ	
Audio Output	AV1/AV2(21pin) x 2, LINE(pin jack) x 2 Standard output: 0.5 Vrms Full scale: 2.0 Vrms at 1KHz Output impedance: Less than 1.0KΩ	
Digital Output	Digital Audio Optical Output Connector (PCM,Dolby Digital,DTS,MPEG)	
Dimensions	Approx. 430 (W) x 58 (H) x 329 (D) mm	
Mass	Approx. 4.2 kg	
Operating temperature	5°C - 40°C	
Operating humidity range	10 %-80 % RH (no condensation)	
LASER Specification (Class 1 LASER Product)		
Wave length	780 nm(CDs), 662 nm(DVDs)	
Laser power	No hazardous radiation is emitted with the safety protection.	
Solder	These models use lead free solder (PbF).	

Notes : Mass and dimensions are approximate.  
Specifications are subject to change without notice.

## 5. New Feature

### 5.1. About DivX

#### 5.1.1. General

DivX is a new video compressing format that is applied MPEG4 technology to improve image quality and the compressibility, and it is developed by the DivXNetworks, Inc., Video file of high resolution and the high picture quality can be made though it is a high compressibility. DivX codec is necessary for converting video to DivX file and .playback files made.

### 5.1.2. Operating Instructions about DivX Video-on-Demand Content

DivX Video-on-Demand (VOD) content is encrypted for copyright protection. In order to play DivX VOD content on this unit, you first need to register the unit.

Follow the on line instructions for purchasing DivX VOD content to enter unit's registration code and register unit. Visit [www.divx.com/vod](http://www.divx.com/vod) for more information.

Display unit's registration code.

- We recommend that you make a note of this code for future reference.
- After playing DivX VOD content for first time, another registration code is then displayed in “DivX Registration”. Do not use this registration code to purchase DivX VOD content. If you use this code to purchase DivX VOD content, and then play content on this unit, you will no longer be able to play any content that you purchased using previous code.
- If you purchase DivX VOD content using a registration code different from this unit's code, you will not be able to play this content. (“Authorization Error” is displayed.)

#### **Regarding DivX content that can only be played a set number of times**

Some DivX VOD content can only be played a set number of times.

When you play this content, remaining number of plays is displayed. You cannot play this content when number of remaining plays is zero. (“Rental Expired” is displayed.)

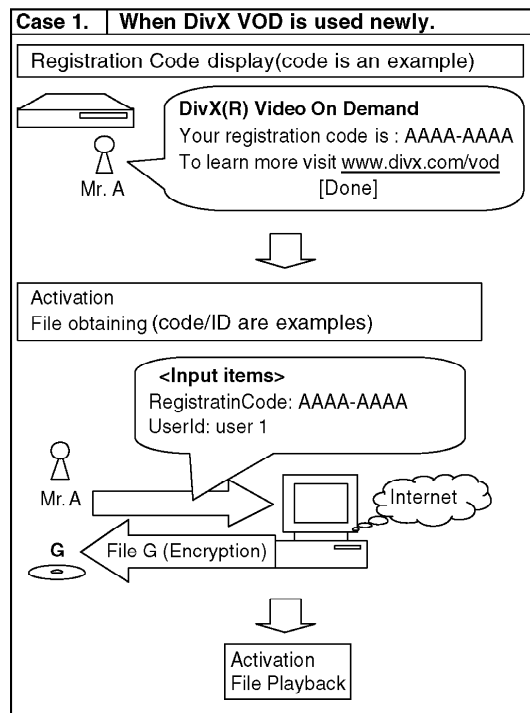

When playing this content

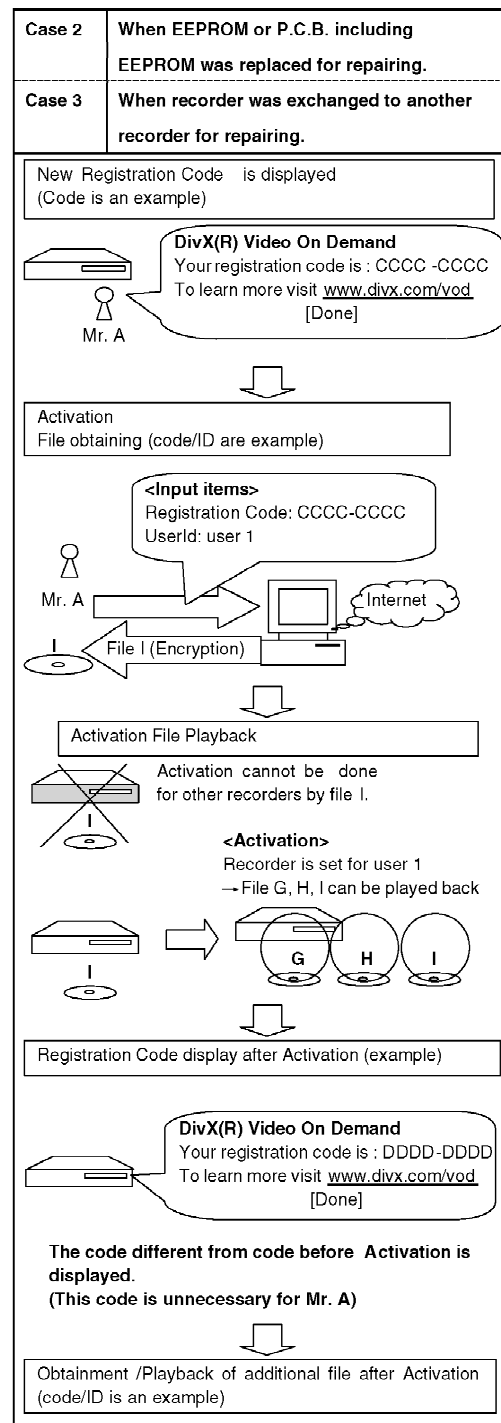

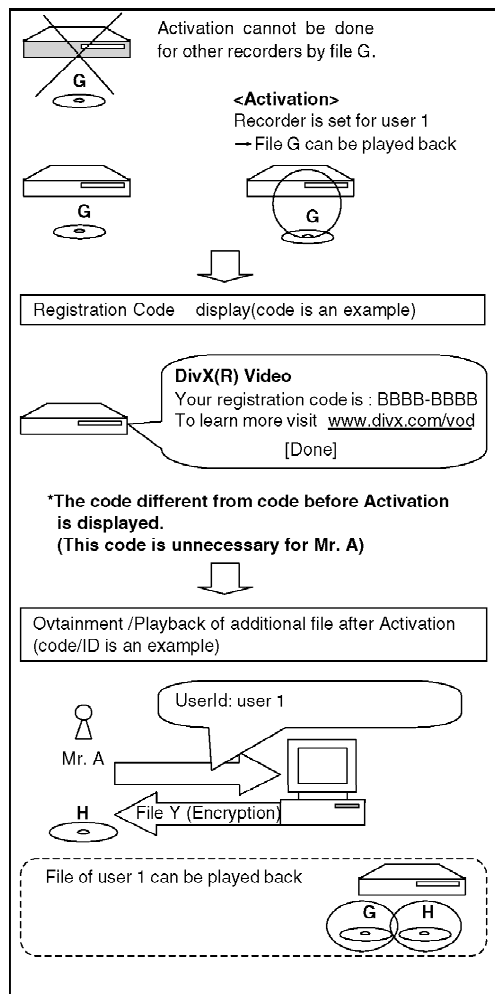

- Number of remaining plays is reduced by one if
  - you press [POWER].
  - you press [STOP].
  - you press [◀◀ SKIP], [◀◀ SLOW/SEARCH] or [▶▶ SLOW/SEARCH] etc. and arrive at another content or start of content being played.
  - scheduled recording starts on HDD.
  - you press [DRIVE SELECT] to change drive.

\* Resume functions do not work.

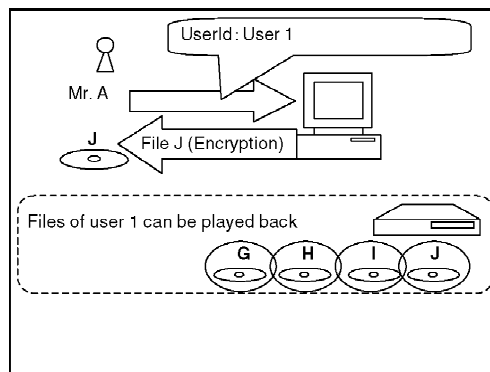

**Typical Playback procedure of DivX VOD (Video On Demand)**

<b>Case 1</b>	When DivX VOD is used newly.
<b>Case 2</b>	When EEPROM or P.C.B. including EEPROM was replaced for repairing.
<b>Case 3</b>	When recorder was exchanged to another recorder for repairing.
<b>Case 4</b>	When customer own second recorder
<b>Case 5</b>	When owner of recorder was changed to another.

#### Case 4 When customer own second recorder

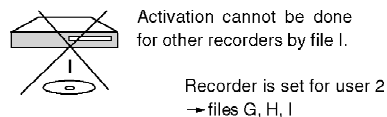

Registration Code display of second recorder (code is an example)

Activation  
File obtaining (code/ID are example)

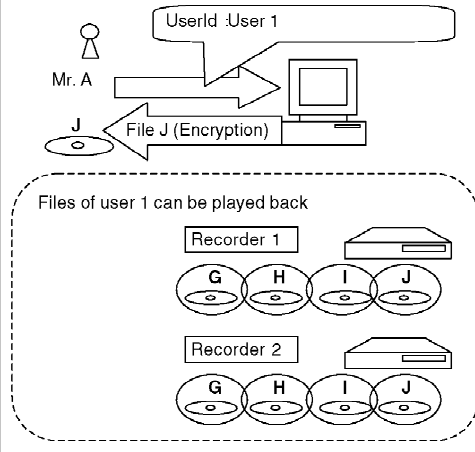

Activation  
File Playback

Registration Code display after Activation (example)

Obtainment /Playback of additional file after Activation (code/ID is an example)

#### Case 5 When owner of recorder was changed to another.

It is necessary to update information on the recorder

⑦ Activation

Registration Code is displayed

⑧ Activation  
File obtaining (code/ID are example)

File kind

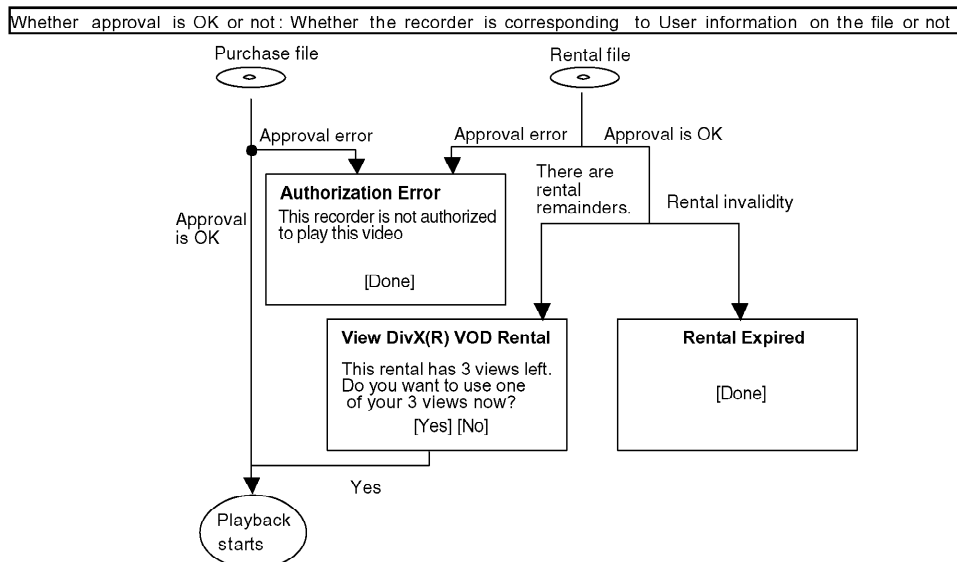

(There are two kind of Activation files as follows too.)

- Rental : There is a playback limitation
- Purchase : Unrestricted

Also there is next file as DRM files besides the above-mentioned.

·**Base**: It is not necessary to approve though the contents is being encoded. → If it is recorder/player for DRM, any can play back. (It is the same as usual DivX file when seeing from user.)

Screen shift (Error display)

### 5.1.3. About DivX DRM

Divx file includes file to which DRM(Digital Right Management) is applied and file not applied. This item is a content that relates only in treating file to which DRM is applied.

## 1. Registration Code display function

## 2. User's registration and approval function

## 3. Rental management function

### 1) Registration Code display function

Registration Code is alphanumeric character sequence 8bytes inputted as recorder information, in case a use purchases or rent a DivX DRM file in a network.

Registration code is a character sequence generated at random, and differs in each recorder.

Moreover, Registration code is updated by new user authentication ever if same recorder.

**2) User's registration and approval function**

- Only one user can register for one recorder. If user's registration is not done with the recorder, DivX file cannot be played back.
- User's registration is performed only when a DivX DRM file is first chosen by recorder
- DivX DRM file that can perform user's registration is only a file that is registered Registration Code and purchased or rented.
- User authentication is performed whenever DivX DRM file is played back.  
Error message is displayed when failing in user's registration and approval.

**3) Rental management function**

There are purchase file without registration of number of playback and rental files with registration of number of playback as Divx file. Number of playback of rental file is counted by the recorder.

When rental file is played, remaining number of times that can be played back will be shown to users, recorder requests users to input yes or no.

Following specifications have been installed for the rental files in the purpose to clarify the count condition of number of times of playback.

- **Conditions on counting number of times of play.**
  1. When a file was opened successfully. (At the time of playback start)
  2. When you have done review operation from the start. (Skip to file head)
    - At this time, remaining number of times that can be played back and confirmation message [Do you play really?] are displayed.
    - When the playback point has been skipped to the top of title, number of playback is not counted if the top of title was not recognized.
    - Even if the power failure occurs after start of playback of rental file, number of times of playback counted at start of the playback is held as it is. (Though playback stops by power failure, the number of times of playback is not counted.)

When it has reached head of title, the playback is ended, and screen becomes DivX menu (There is no resume) and then cursor is located on title that has been played back.

Then if the same file was continuously played back, it begins to playback from the file head.

**Note:**

Above mentioned stored user information and number of times of playback are not erased by update of firmware or by initialization by test mode.

## **6. Location of Controls and Components**

Followings are the Location of Controls and Components for DMR-EH55EC and DMR-EH56EG as a sample.

For other model, refer to each Operation Instructions.

## **7. Operation Instructions**

### **7.1. Taking out the Disc from DVD-Drive Unit when the Disc cannot be ejected by OPEN/CLOSE button**

#### **7.1.1. Forcible Disc Eject**

7.1.1.1. When the power can be turned off.

1. Turn off the power and press [STOP] [CH UP] keys on the front panel simultaneously for 5 seconds.

7.1.1.2. When the power can not be turned off.

1. Press [POWER] key on the front panel for over 10 seconds to turn off the power forcibly, and press [STOP] [CH UP] keys on the front panel simultaneously for 5 seconds.

#### **7.1.2. When the Forcible Disc Eject can not be done.**

1. Turn off the power and pull out AC cord.
2. Remove the Top Case.
3. Put deck so that bottom can be seen.
4. Slide SLIDE CAM by Eject Pin (JZJ0484) or minus screw driver (small) in the direction of arrow to eject tray slightly.

**5. Put deck upward, and push out Tray by Eject Pin (JZS0484) or minus screw driver (small).**

## **8. Service Mode**

### **8.1. Self-Diagnosis and Special Mode Setting**

#### **8.1.1. Self-Diagnosis Functions**

Self-Diagnosis Function provides information for errors to service personnel by “Self-Diagnosis Display” when any error has occurred. U\*\*, H\*\* and F\*\* are stored in memory and held.

You can check latest error code by transmitting [0] [1] of Remote Controller in Service Mode.

Automatic Display on FL will be cancelled when the power is turned off or AC input is turned off during self-diagnosis display is ON.

Error Code	Diagnosis contents	Description	Monitor Display	Automatic FL display
U30	Remote control code error	Display appears when main unit and remote controller codes are not matched.	No display	<div>DVD *</div> <p>“*” is remote controller code of the main unit. Display for 5 seconds.</p>
U59	Abnormal inner temperature detected	Display appears when the drive temperature exceeds 70°C. The power is turned off forcibly. For 30 minutes after this, all key entries are disabled. (Fan motor operates at the highest speed for the first 5 minutes. For the remaining 25 minutes, fan motor is also stopped.) The event is saved in memory as well.	No display	<div>U59</div> <p>“U59 is displayed for 30 minutes.</p>
U61	<p>The unit is carrying out its recovery process.</p> <p>(with no disc in the disc tray)</p>	<ul style="list-style-type: none"> <li>The unit detected an error while recording or playing <u>with no disc in the disc tray</u>. The unit is carrying out its recovery process. This process restores the unit to normal operation. The unit is not broken. Wait until the message disappears.</li> </ul>	No display	<div>U61</div>
U88	<p>The unit is carrying out its recovery process.</p> <p>(with a disc in the disc tray)</p>	<ul style="list-style-type: none"> <li>The unit detected an error while recording or playing <u>with a disc in the disc tray</u>. The unit is carrying out its recovery process. This process restores the unit to normal operation. The unit is not broken. Wait until the message disappears.</li> </ul>	No display	<div>U88</div>

Error Code	Diagnosis contents	Description	Monitor Display	Automatic FL display
U99	Hang-up	Displayed when communication error has occurred between Main microprocessor and Timer microprocessor.	No display	<div>U99</div> <p>Displayed is left until the [POWER] key is pressed.</p>
H19	Inoperative fan motor	<p>When inoperative fan motor is detected after powered on, the power is turned off automatically.</p> <p>The event is saved in memory.</p>	No display	No display
F00	No error information	<p>Initial setting for error code in memory</p> <p>(Error code Initialization is possible with error code initialization and main unit initialization.)</p>	No display	No display
F58	Drive hardware error	When drive unit error is detected, the event is saved in memory.	No display	No display
F34	Initialization error when main microprocessor is started up for program recording	<p>When initialization error is detected after starting up main microprocessor for program recording, the power is turned off automatically.</p> <p>The event is saved in memory.</p>	No display	No display

Error Code	Diagnosis contents	Description	Monitor Display	Automatic FL display
UNSUPPORTED	Unsupported disc error	<p>*An unsupported format disc was played, although the drive starts normally.</p> <p>*The data format is not supported, although the media type is supported.</p> <p>*Exceptionally in case of the disc is dirty.</p>	"This disc is incompatible."	<div>UNSUP</div> <div>↓</div> <div>PORT</div> <p>Display for 5 seconds.</p>
NO READ	Disc read error	<p>*A disc is flawed or dirty.</p> <p>*A poor quality failed to start.</p> <p>*The track information could not be read.</p>	"Cannot read. Please check the disc."	<div>NOREAD</div>
HARD ERR	Drive error	The drive detected a hard error.	"DVD drive error."	<p>Display for 5 seconds.</p> <div>HARD</div> <div>↓</div> <div>ERR</div>
SELF CHECK	Restoration operation	<p>Since the power cord fell out during a power failure or operation, it is under restoration operation.</p> <p>*It will OK, if a display disappears automatically. If a display does not disappear, there is the possibility that defective Digital P.C.B. / RAM drive.</p>	No display	<div>SELF</div> <div>↓</div> <div>CHECK</div>

Error Code	Diagnosis contents	Description	Monitor Display	Automatic FL display
PLEASE WAIT	Unit is in termination process	Unit is in termination process now. “BYE” is displayed and power will be turned off. In case “Quick Start” of setup menu is ON, it is displayed in restoration operation for AC off.	No display	<div>PLEASE</div> <div>↓</div> <div>WAIT</div>
UNFORMAT	Unformatted disc error	You have inserted an unformatted DVD-RAM or DVD-RW that is unformatted or recorded on other equipment.	<div>Format</div> <div>This disc is not formatted properly. Format the disc in DISK MANAGEMENT?</div>	<div>UNFOR</div> <div>↓</div> <div>MAT</div>
HDD ERROR	[HDD ERR] is displayed when start up of HDD was failed. (Except error of setting of Power on Stand-by)	a) When normal start up was failed. b) When start up at HDD boot was failed. c) When start up from state of P-OFF was / failed. d) When start up from state of HDD SLEEP / was failed. [HDD ERR] is displayed when above each start up of HDD was failed. *In case b), tray opens automatically and [HDDERR] is displayed until version up disc is inserted.	No display	<div>HDDERR</div>

Error Code	Diagnosis contents	Description	Monitor Display	Automatic FL display
HDD NG	Power on Stand-by setting error	[HDD NG] is displayed when power on Stand-by setting of HDD is NG or when HDD which power on Stand-by is not set to is used. Please try to replace HDD with genuine HDD as service parts.	No display	HDD NG

### 8.1.2. Special Modes Setting

Item		FL display	Key operation
Mode name	Description		Front Key
TEST Mode	*All the main unit's parameters (include tuner) are initialized.	TM AV1	Press [STOP], [CH UP] and [OPEN/CLOSE] keys simultaneously for five seconds when power is off.
Rating password	The audiovisual level setting password is initialized to "Level 8".	INIT	Open the tray, and press [REC] and [PLAY] simultaneously for 5 seconds.
Service Mode	Setting every kind of modes for servicing. *Details are described in "8.1.3. Service Mode at a glance".	SERV	When the power is off, press [CH UP], [OPEN/CLOSE] and [REC] keys simultaneously for 5 seconds.

Item		FL display	Key operation
Mode name	Description		Front Key
Forced disc eject	<p>Removing a disc that cannot be ejected. The tray will open and unit will shift to P-off mode.</p> <p><b>*When Timer REC is ON or EXT-LINK is ON, execute " Forced disc eject " after releasing Timer REC or EXT-LINK.</b></p> <p><b>*This command is not effective during "Child lock" is ON.</b></p> <p><b>While Demonstration Lock is being set, this Forced disc eject function is not accepted.</b></p> <div> <p>If this command was executed while TIMER REC is being set, TIMER REC setting will be kept.</p> </div>	<p>The display before execution leaves.</p> <div> <p>*****</p> </div>	<p>When the power is off, press [STOP] and [CH UP] keys simultaneously for 5 seconds.</p>
Child lock/unlock	Set or release "Child Lock".	<div> <p>X HOLD</p> </div>	<p>Press [ENTER] and [RETURN] by remote controller simultaneously until [X-HOLD] is displayed.</p>
NTSC/PAL system select	To switch PAL/NTSC alternately.	<p>The display before execution leaves.</p> <div> <p>*****</p> </div>	<p>While the power is on (E-E mode), press [STOP] and [OPEN/CLOSE] simultaneously for 5 seconds.</p>

Item		FL display	Key operation
Mode name	Description		Front Key
Forced power-off	<p>When the power button is not effective while power is ON, turn off the power forcibly.</p> <p>*When Timer REC is ON or EXT-LINK is ON, execute “Forced Power-off” after releasing Timer REC or EXT-LINK.</p>	Display in P-off mode.	Press [Power] key over than 10 seconds.

Item		FL display	Key operation
Mode name	Description		Front Key
Aging	<p>Perform sequence of modes as * Aging Description shown below continually.</p> <div> <p>Caution:</p> <p>All programs in DVD-RAM disc will be deleted because Formatting is done once in Aging process.</p> </div>	Display following the then mode.	<p>When the power is ON, press [STOP], [POWER] and [OPEN/CLOSE] simultaneously for over 5 seconds and less than 10 seconds.</p> <p><b>NOTE1:</b></p> <p>If Unit has not turned into Aging mode by operations shown above, execute TEST MODE once and re-execute operation shown above. (*All the main unit's parameters include tuner are initialized by TEST mode.)</p> <p><b>NOTE2:</b></p> <p>If the unit has hung-up because of pressing keys for over 10 seconds, once turn off the power, and re-execute this command. *When releasing Aging</p>

			When recording / Aging mode, press [POWER] key.
	Item	FL display	Key operation
Mode name	Description		Front Key

## 9. Service Fixture & Tools

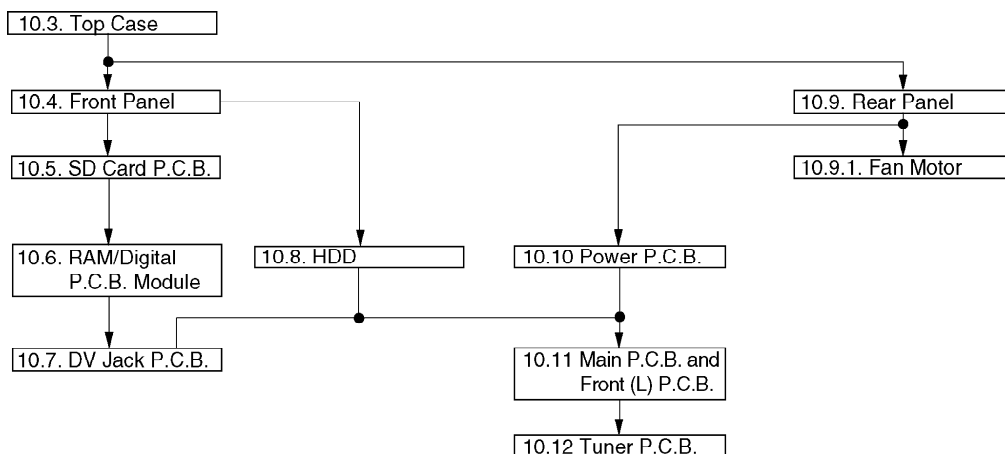

Part Number	Description	Compatibility
RFKZ0260	Extension Cable (MainP.C.B. - RAM/Digital P.C.B. Module/ 88 Pin)	Same as EH50 Series
RFKZ0216	Extension Cable (MainP.C.B. - Power P.C.B./ 23 Pin)	Same as E55 Series
RFKZ0366	Extension FFC (HDD - RAM/Digital P.C.B. Module/ 40 Pin)	New
RFKZ0168	Extension Cable (Power P.C.B. - Fan Motor/ 3 Pin)	Same as E50/ E55 Series
RFKZ0339	Extension Cable (MainP.C.B. - HDD / 4 Pin)	New
JZS0484	Eject Pin	Same as E50 Series
RFKZ03D01K	Lead Free Solder (0.3mm/100g Reel)	New
RFKZ06D01K	Lead Free Solder (0.6mm/100g Reel)	New
RFKZ10D01K	Lead Free Solder (1.0mm/100g Reel))	New
RFKZ0316	Solder Remover (Lead free 10W temperature Solder/180g)	New
RFKZ0328	Flux	New
RFKZ0329	Bottle of Flux	New

## 10. Disassembly and Assembly Instructions

### 10.1. Disassembly Flow Chart

The following chart is the procedure for disassembling the casing and inside parts for internal inspection when carrying out the servicing.

To assemble the unit, reverse the steps shown in the chart below.

### 10.2. P.C.B. Positions

### 10.3. Top Case

1. Remove 2 screws (A) and 3 screws (B).
2. Slide Top Case rearward and open the both ends at rear side of

the Top Case a little and lift the Top Case in the direction of the arrows.

#### 10.4. Front Panel

1. Unlock 6 tabs in (A) - (F) turn.

Pull with the front panel in the direction of your side.

#### 10.5. SD Card P.C.B.

1. Remove 1 FFC and 2 screws (A) to remove SD Card P.C.B..

## 10.6. RAM/Digital P.C.B. Module

### Caution:

Pairing of RAM Drive and Digital P.C.B. as "RAM/Digital P.C.B. Module" have to be replaced together. If the pairing is changed, RAM Drive unit has to be re-aligned. Because the alignment data for RAM Drive Unit is stored in Digital P.C.B..

1. Remove 1 FFC and Screws (A).
2. Lift up Digital P.C.B. slightly so to disconnect Connectors to remove Digital P.C.B.

### 3. Put Digital P.C.B. on RAM Drive and remove RAM/Digital P.C.B. Module.

#### Note:

**RAM/Digital P.C.B. Module as service part has no heat sink unit.**

**Before returning to customer, heat sink unit should be installed on Digital P.C.B..**

## 10.7. DV Jack P.C.B.

1. Remove 1 Screw (A) to remove DV Jack P.C.B.

## 10.8. HDD

**Caution:**

Writing the main firmware to the unit is necessary after replacing the HDD.  
Prepare the latest firmware updating disc.

\* The main firmware is recorded in the HDD, but the replacement HDD has no data (and needs to be formatted).

**Writing Procedure of Main Firm:****Caution:**

- (1) Writing of Main Firm needs 3, 4 minutes.
- (2) Never cut the power of DVD Recorder until writing in Firmware ends.
- (3) Initial settings and contents of reservation will not change if writing is normally completed.

1. Prepare latest firmware updating disc.
2. Replace HDD.
3. Turn on power of DVD Recorder.
4. After [PLEASE WAIT] is displayed on FL, [HDD ERR] is displayed on FL.
5. Tray opens automatically.
6. Insert updating disc for Firmware and press OPEN/CLOSE key.  
(If a wrong disc was inserted, [NG DISK] [NO FVU] is displayed on FL.)
7. [LOAD] → [LD FVU] ↔ [M\_FIRM] are displayed on FL alternately.
8. [MAIN] ↔ [UPD OK] blink alternately and Tray opens.  
Take out disc (Writing was finished).
9. Press Power button to turn off power.
10. Press Power button to turn on power.
11. [HELLO] → [SELF CHECK] are displayed on FL.
12. [UNFORMAT] is displayed on FL.
13. After [UNFORMAT] was displayed, message to request FORMAT is displayed on TV screen.
14. Select [Yes] and press [ENTER] key to format HDD.  
(After FORMAT, program in HDD will be lost, but Main firm will not be lost.)

**"Write of the main farm" is completed above.**

\* Drive firm is not updated by above operation. If you wish update Drive firm, please prepare the disc for latest firmware update, and write it again.

\* If the version of the firm you have prepared was same as or later than that has already been written in deck, 'UNSUPPORT' is displayed on FL.

\* In a usual updating of firmware, writing is not performed when the timer reservation standby was not released.

**Handling of HDD**

The following precautions should be taken when handling HDD.

- a. Never give an impact to HDD. (Even a drop from 1cm height can be a cause of HDD failure.)
- b. When placing HDD on a workbench, provide a mat on a bench for shock absorption and anti-static purposes.
- c. When installing HDD, release it from your hands only after confirming that it is fully set on the chassis.
- d. Avoid stacking up HDD.
- e. HDD is unstable and easy to fall. Do not stand it on its side face.
- f. When handling HDD, hold its side faces to avoid static hazard.
- g. Do not place HDD on its wrapping bag after removal. (Prevention of static hazard)
- h. Use a screwdriver with low impact and anti-static features.

**Note:**

When replacing HDD, please make the rear jumper slave or cable select configuration.

- 1. Remove ATAPI Connector and HDD Power Connector.**
- 2. Remove 4 Screws (A) to remove HDD Angle with HDD.**

- 3. Put HDD with HDD Angle up and down inversely so as not to give a shock to HDD.**

- 4. Remove 4 screws (A) remove HDD.**

#### **Caution for Attaching HDD**

**Put HDD up and down inversely so as not to give a shock to HDD,** and put HDD Angle on to HDD and tighten 4 screws while lifting HDD Angle so as to keep maximum gap between HDD and HDD Angle.

## 10.9. Rear Panel

### 1. Disconnect Fan Connector.

### 2. Remove 6 Screws (A) and 1 Screw (B).

### 3. Unlock 2 Locking Tabs (A) to remove Rear Panel.

### 10.9.1. Fan Motor

1. Disconnect Fan Connector and remove 2 Screws (A).
2. Push and unlock 2 Locking Tabs (A) to remove Fan Motor.

### 10.10. Power P.C.B.

1. Remove 1 Screw (A).

2. Remove 3 Screws (B) and disconnect Connector (A) to remove Power P.C.B..

## 10.11. Main P.C.B. and Front (L) P.C.B.

### 1. Remove 1 Screw (A).

### 2. Remove 4 Screws (A) and 1 Screw (B).

### 3. Remove Digital Angle to remove Main P.C.B. and Front (L) P.C.B..

## 10.12. Tuner P.C.B.

1. Pull out the Tuner P.C.B. in the direction of the arrow.

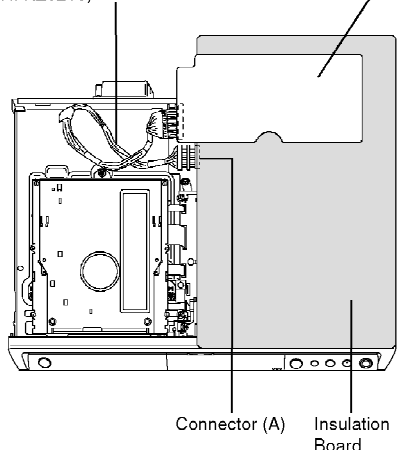

# 11. Measurements and Adjustments

## 11.1. Service Positions

**Note:**

For description of the disassembling procedure, see the section 10.

### 11.1.1. Checking and Repairing of Power P.C.B.

<p><b>1. Top Case</b></p> <div style="border: 1px solid black; padding: 2px; margin-bottom: 2px;">Remove 2 Screws (A) on side</div> <div style="border: 1px solid black; padding: 2px; margin-bottom: 2px;">Remove 3 rear Screws (B) on rear</div> <div style="border: 1px solid black; padding: 2px; margin-bottom: 2px;">Remove Top Case</div> <p>↓</p> <p><b>2. Power P.C.B.</b></p> <div style="border: 1px solid black; padding: 2px; margin-bottom: 2px;">Remove 1 Screw (A) for AC Inlet fixing</div> <div style="border: 1px solid black; padding: 2px; margin-bottom: 2px;">Remove 3 Screws (B) for Power P.C.B. fixing</div> <div style="border: 1px solid black; padding: 2px; margin-bottom: 2px;">Remove Connector (A) to Main P.C.B.</div> <p>↓</p> <div style="border: 1px solid black; padding: 5px;"> <p>Connect Extension Cable between Main P.C.B. and Power P.C.B. (RFKZ0216).</p> <p>Put Power P.C.B. on Insulation Board so that it's foil side faces top.</p> </div>	<div style="border: 1px solid black; padding: 5px; margin-bottom: 10px;"> <p><b>Caution:</b></p> <p>Red wire in the extension cable should be connected to (1) pin.</p> </div> <div style="text-align: center;"> <p>Extension Cable between Main P.C.B. and Power P.C.B. (RFKZ0216)</p>  <p>Foil side of Power P.C.B.</p> <p>Connector (A)    Insulation Board</p> </div>
---	---

### 11.1.2. Checking and Repairing of RAM / Digital P.C.B. Module

**1. Top Case**

Remove 2 Screws (A) on side

Remove 3 rear Screws (B) on rear

Remove Top Case

**2. Front Panel**

Unlock 1 Locking Tab on upper

Unlock 2 Locking Tabs on side

Unlock 3 Locking Tabs on bottom

Remove Front Panel

**3. SD Card P.C.B.**

Remove 2 Screws fixing SD Card P.C.B.

Remove 1 FFC from Digital P.C.B.

Remove SD Card P.C.B.

**4. RAM/Digital P.C.B. Module**

Remove 6 Screws (A) fixing RAM/Digital P.C.B. Module

Remove 1 FFC from HDD

Lift up Digital P.C.B. to remove it

**5. DV Jack P.C.B.**

Remove 1 Screw (A) fixing DV Jack P.C.B.

Remove DV Jack P.C.B.

Attach DV Jack P.C.B. on to Digital P.C.B., SD Card P.C.B. is wrapped with insulation sheet. Connecting to Digital P.C.B. with original FFC.

Put RAM/Digital P.C.B. Module on side.

Connect Extension Cable between HDD and RAM/Digital P.C.B. Module (RFKZ0366), and between Main P.C.B. and RAM/Digital P.C.B. Module (RFKZ0260).

**Caution:**

Red wire in the extension cable should be connected to (1) pin.

**Note:**

SD Card P.C.B. is wrapped with insulation sheet.

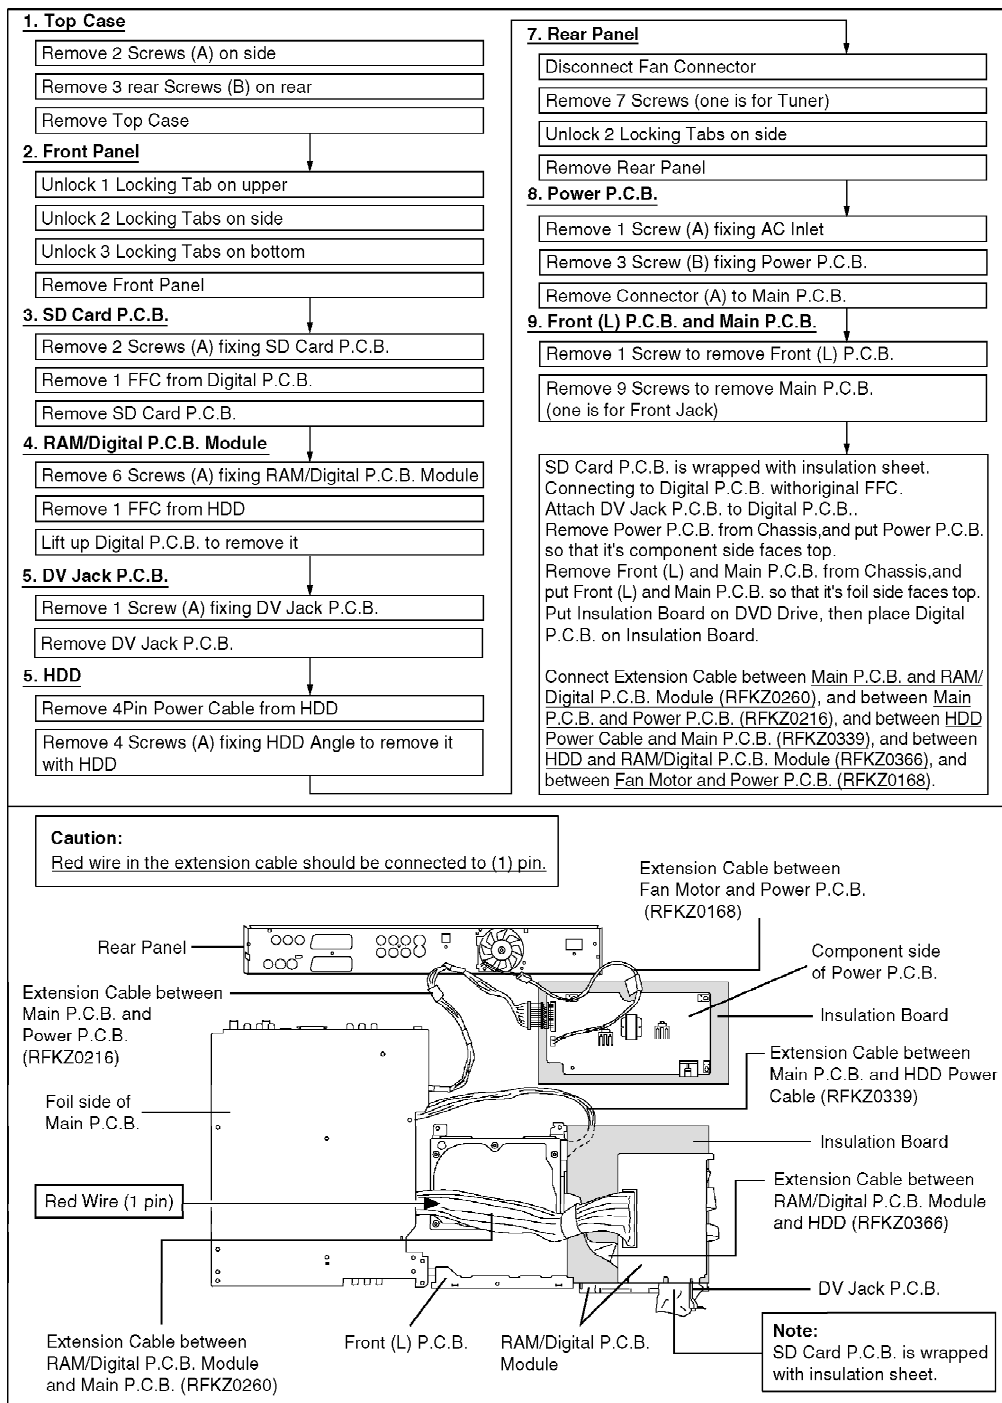

Extension Cable between RAM/Digital P.C.B. Module and HDD (RFKZ0366)

Extension Cable between RAM/Digital P.C.B. Module and Main P.C.B. (RFKZ0260)

RAM/Digital P.C.B. Module

Red Wire (1 pin)

### 11.1.3. Checking and Repairing of Main P.C.B.

## 11.1.4. Checking and Repairing of HDD

### 1. Top Case

Remove 2 Screws (A) on side

Remove 3 rear Screws (B) on rear

Remove Top Case

### 2. HDD

Remove 1 FFC from Digital P.C.B.

Remove 4 Pin Power Cable from Main P.C.B.

Remove 4 Screws (A) to remove HDD Angle with HDD

Connect HDD ATAPI Connector to Replacement HDD

Connect 4 Pin Power Cable to Replacement HDD

Put Replacement HDD on Insulation Board.

Connect Extension Cable between Replacement HDD and RAM/Digital P.C.B. Module (RFKZ0366), and between Replacement HDD and Main P.C.B. (RFKZ0339).

#### Caution for Removing HDD

Put HDD with HDD Angle up and down inversely and remove 4 screws to remove HDD so as not to give a shock to HDD.

#### Caution for Attaching HDD

Put HDD up and down inversely, and put HDD Angle on to HDD and tighten 4 screws while lifting HDD Angle so as to keep maximum gap between HDD and HDD Angle.

## 11.2. Caution for Replacing Parts

### 11.2.1. Items that should be done after replacing parts

✓ : Necessary      — : Unnecessary

Items that Should be done	Reset IC7501 (*Note1)	Obtain and register a new registration code. (*Note2)	Main Firm update (*Note3)	HDD Format
Replacing Parts				
Main P.C.B.	✓	✓	—	✓
IC7501 (Timer IC)	✓	—	—	—
IC7404 (EEPROM)	—	✓	—	✓
HDD	—	—	✓	✓

**\*Note1:**  
Resetting Method

Reset object	Condition of power	Short Terminal
IC7501 (Timer IC)	POWER ON	IC7502-4 (RESET_L) and GND

**\*Note2:**

Please will always pass the customer “Warning for Customers Who Use the DivX Video-on-Demand content.” with the product and get it when you unavoidably exchange EEPROM or P.C.B. including EEPROM (When the product is exchanged, it is the same.).

You must use print attached to service part (EEPROM or P.C.B. including EEPROM) or must use copy of print below as “Warning for Customers who use the DivX Video-on-Demand content.”

Information needed without fail for the customer for whom it is used continuing DivX Video-on-Demand Service to “Manual for the customer” is recorded.

Appendix:

\* Parts that memorize user's information are only EEPROM.

\* The registration of Registration Code is possible for half a year up to 6 recorders up to 10 recorders a year. Replacement of EEPROM or P.C.B. including EEPROM spends one of this.

Registration Code is memorized in EEPROM (RFKFxxxxxx).

Model without VHS: Main P.C.B.

Model with VHS: Digital I/F P.C.B. (Power & DVD I/F/P.C.B.)

If exchange above P.C.B. or EEPROM, new registration Code differ from previous Registration Code will be generated.

In this case if your customer uses DivX Video-on-Demand service, he/she will no longer be able to play any content that he/she purchased under that same registration code.

Therefore your customer will need to obtain and register the new registration code.

\*Copy this page and cut on the dotted line and give the lower half to your customer.

### Warning for Customers who use the DivX Video-on-Demand content.

1. The registration code has been changed for the repair of the product or the product exchange.
2. Obtain and register a new registration code, otherwise you will no longer be able to play DivX Video-on-Demand content.
3. Follow the procedure on the DivX Video-on-Demand web site to register at

<http://vod.divx.com/>

\* If you do not use the DivX Video-on-Demand content, please ignore this warning.

**Note3:**

**Please prepare latest firmware updating disc.**

**\* Main Firm is being recorded in HDD, but new HDD has no data.**

**Writing Procedure of Main Firm:**

**<<Caution>>**

**(1) Writing of Main Firm needs 3, 4 minutes.**

**(2) Never cut the power of DVD Recorder until writing in Firmware ends.**

**(3) Initial settings and contents of reservation will not change if writing is normally completed.**

**1. Prepare updating disc for firm ware.**

**2. Replace HDD.**

3. Turn on power of DVD Recorder.
4. After [PLEASE WAIT] is displayed on FL., [HDD ERR] is displayed on FL.
5. Tray opens automatically.
6. Insert updating disc for Firmware and press OPEN/CLOSE key. (If a wrong disc was inserted, [NG DISK] [NO FVU] is displayed on FL.)
7. [LOAD] → [LD FVU] ← → [M\_FIRM] are displayed on FL alternately.
8. [MAIN] ← → [UPD OK] blink alternately and Tray opens. Take out disc (Writing was finished).
9. Press Power button to turn off power.
10. Press Power button to turn on power.
11. [HELLO] → [SELF CHECK] are displayed on FL.
12. [UNFORMAT] is displayed on FL.
13. After [UNFORMAT] was displayed, message to request FORMAT is displayed on TV screen.
14. Select [Yes] and press [ENTER] key to format HDD.

(After FORMAT, program in HDD will be lost, but Main firm will not be lost.

"Write of the main farm" is completed above.

\* Drive firm is not updated by above operation. If you wish update Drive firm, please prepare the disc for latest firmware update, and write it again.

\* If the version of the firm you have prepared was same as or later than that has already been written in deck, 'UNSUPPORT' is displayed on FL.

\* In a usual updating of firmware, writing is not performed when the timer reservation standby was not released.

### **11.3. Standard Inspection Specifications after Making Repairs**

After making repairs, we recommend performing the following inspection, to check normal operation.

No.	Procedure	Item to Check
1	Turn on the power, and confirm items pointed out.	Items pointed out should reappear.
2	Insert RAM disc.	The Panasonic RAM disc should be recorded.
3	Enter the EE (TU IN / AV IN - AV OUT) mode.	No abnormality should be seen in the picture sound or operation.
4	Perform auto recording and playback for one minute using the RAM disc.	No abnormality should be seen in the picture sound or operation. *Panasonic DVD-RAM disc should be used for recording and playback.
5	Model with the HDD: Perform auto recording and playback for one minute using the HDD.	No abnormality should be seen in the picture sound or operation.
6	If a problem is caused by a VCD, DVD-R, DVD-Video, Audio-CD, or MP3, playback the test disc.	No abnormality should be seen in the picture sound or operation.
7	Models with SD Card Slot or DV Input Jack: In case of that the trouble is caused by SD card and/or DV terminal.	Models with SD Card or DV Input Jack; 1) SD Card: Check to be able to display a picture. 2) DV terminal: Check to be able to record DVC.
8	After checking and making repairs, upgrade the firmware to the latest version.	Make sure that [FIRM_SUCCESS] appears in the FL display. *[UNSUPPORT] display means the unit is updated to newest same version. Then version up is not necessary.
9	Transfer [9][9] in the service mode setting, and initialize the service settings (return various settings and error information to their default values. The laser time is not included in this initialization).	Make sure that [CLR] appears in the FL display. After checking it, turn the power off.

Use the following checklist to establish the judgement criteria for the picture and sound.

Item	Contents	Check	Item	Contents
Picture	Block noise		Sound	Distorted sound
	Crosscut noise			Noise (static, background noise, etc.)
	Dot noise			The sound level is too low.
	Picture disruption			The sound level is too high.
	Not bright enough			The sound level changes.
	Too bright			
	Flickering color			
	Color fading

## 16. Parts and Exploded Views

### 16.1. Exploded Views

#### 16.1.1. Casing Parts & Mechanism Section

### 16.1.2. Packing & Accessories Section

## 16.2. Replacement Parts List

### Notes:

#### \*Important safety notice:

Components identified by mark have special characteristics important for safety.

Furthermore, special parts which have purposes of fire-retardant (resistors), high-quality sound (capacitors), low-noise (resistors), etc. are used.

When replacing any of components, be sure to use only manufactures specified parts shown in the parts list.

\*Warning: This product uses a laser diode. Refer to caution statements.

\*Capacity values are in microfarads (  $\mu$  F) unless specified otherwise, P=Pico-farads (pF), F= Farads (F).

\*Resistance values are in ohms, unless specified otherwise, 1K=1,000 (OHM), 1M=1,000k (OHM).

\*The marking (RTL) indicates the retention time is limited for this item. After the discontinuation of this assembly in production, it will no longer be available.

\*\*“(IA)-(IH)” , marks in Remarks indicate languages of instruction manuals. [(IA): Polish, (IB): English, (IC): German, (ID): Italian, (IE): Dutch, (IF): French, (IG): Spanish, (IH): Swedish/ Danish]

\*Parts indicated with PAVC-CSG in the Remarks column are supplied by PAVC-CSG.

\*All parts except parts indicated with (PAVC-CSG) in the Remarks column are supplied by PAVCG.

**SD Card P.C.B.**

The diagram shows the layout of an SD Card P.C.B. with various components and dimensions. The components are labeled as follows:

- R6807, LB6802, C6801, C6802, R6801, LB6801, R6804, R6805, RX6802, RX6801, CKF19, CKF18, CKF20, R6802, CKF16, CKF14, CKF15, CKF13, CKF12, CKF11, CKF17, CKF10, CKF9, CKF8, CKF7, CKF5, CKF4, CKF3, CKF2, CKF1, CKF0, TL6801, TL6802, TL6803, TL6805, TL6804, P6802, P6803, P6805, P6801.

The dimensions are indicated by the following numbers:

- 10, 11, 8, 7, 6, 5, 4, 4, 3, 3, 2, 1, 9, 12, 13, 14.

The diagram is divided into four quadrants by a horizontal line (A-B) and a vertical line (1-5). The components are distributed across the quadrants, with the largest component, P6801, occupying the bottom-left quadrant.
